

RENER

MIRAGE MAGNIFYING LED MIRROR

TURN MIRROR ON/OFF

To turn the device on/off, tap the button under the face of the magnifier.

The device also has an auto-on feature that will cause the ring light to turn on when the mirror is removed from the docking station, when station is connected to power.

COLOUR CHANGING

Touch and hold the button to change the colour.

To switch between colour change and dimming mode, quickly double tap the button.

DIMMER CONTROL

Touch and hold the button to dim or brighten the ring light.

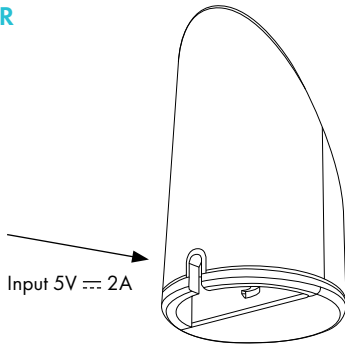

To switch between dimming and colour change, quickly double tap the button.

TO CONNECT THE DOCKING STATION TO POWER

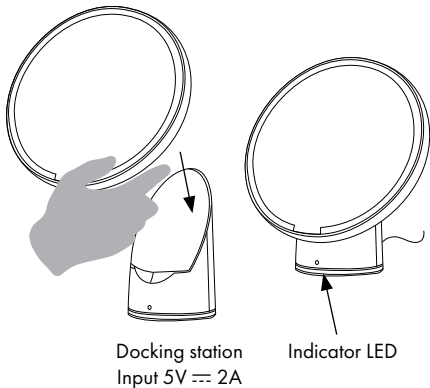

The charger comes with a micro-USB cable that can be plugged into any USB-A socket.

Plug the micro-USB cable into the socket located on the underside of the charging station. The cable can be placed through the gap at the back of the docking station and plugged into a USB-A socket.

CHARGING THE MAGNIFIER

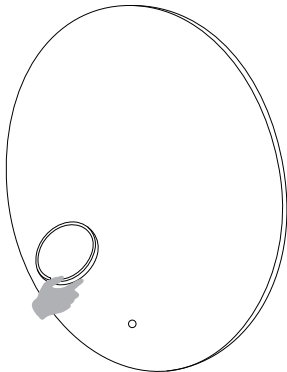

To charge the magnifier, place onto the docking station. The LED on the station will become red for 10s to indicate that a charging connection has been made. A solid red light means the device is charging. A flashing red light indicates the device is not charging and needs to be removed from the station and replaced to make the charging connection.

REMER MIRROR COMPATABILITY

The magnifier can be used with the Remer range of Mirrors which are ordered as a bundle product with Magnifier explicitly mentioned in the product description and code.

Your Mirage magnifier can be placed onto the left side of your Remer mirror, please ensure magnetic connection prior to releasing the mirror. To remove the device off the Mirror, gently tilt the bottom of the magnifier away from the Mirror and lift.
